

Using the Internet Safely by Doug Copley

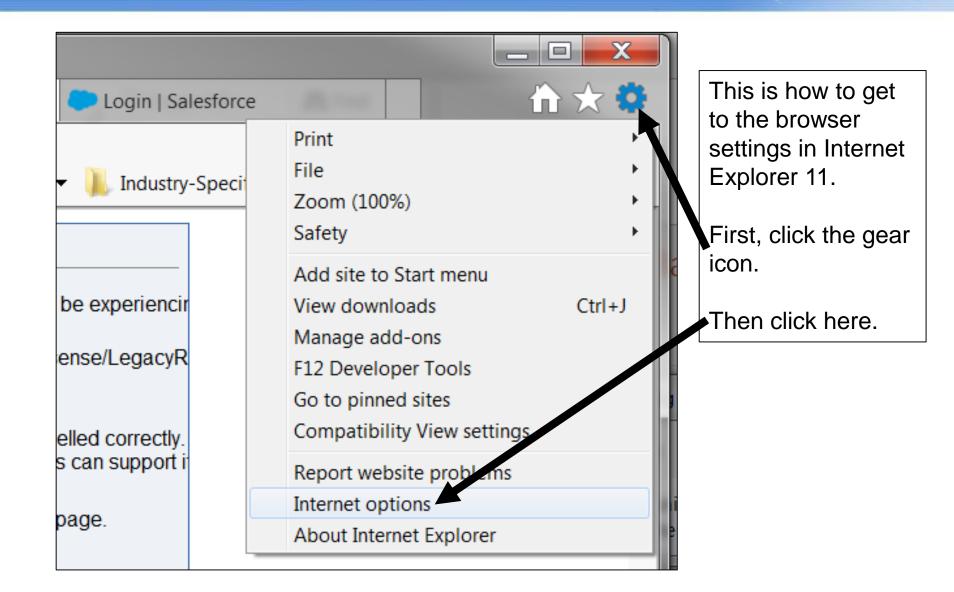

October 23, 2016

Use a Current Browser

Current browsers:

Settings In Internet Exlorer 11 http://www

Settings In Google Chrome

G	Google	×	Douglas	_ 0	X
ng	📕 🥏	New tab New window New incogn	v		Ctrl+T Ctrl+N hift+N
		History Downloads Bookmarks			► Ctrl+J
		Zoom Print	- 1	00% +	Ctrl+P
		Cast Find			Ctrl+F
		More tools Edit	Cut	Сору	Paste
		Settings Help			Þ
		Exit		Ctrl+SI	hift+Q

Enable Browser Protections

- Recommended Settings:
 - Block popup messages by default
 - Block plugins from running automatically
 - Ask if a site wants to use your location

- Don't let sites use your microphone or web cam without permission
- Ask if a site wants to download files
- Clear browser cache and history periodically

Enable Browser Protections

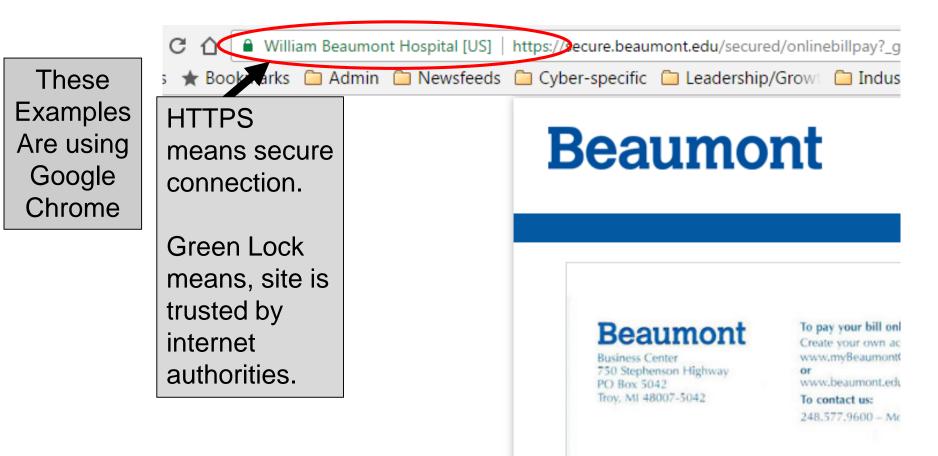

- How-To's:
 - Google Chrome: <u>https://support.google.com/chrome#topic=3421433</u>

http://www

- Microsoft Internet Explorer:
 <u>IE Privacy and Security Settings</u>
- Mozilla FireFox: <u>https://support.mozilla.org/en-US/products/firefox/privacy-and-security</u>
- Apple Safari:

https://support.apple.com/en-us/HT201265

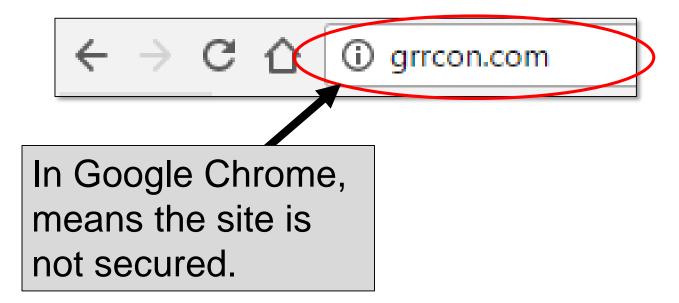

Look For Secure, Known Connections

Look For Secure, Known Connections

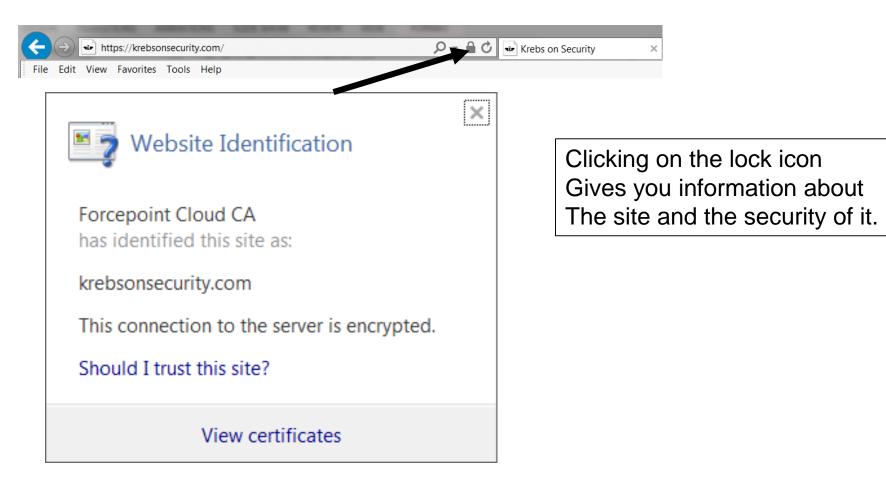

These Examples Are using Google Chrome

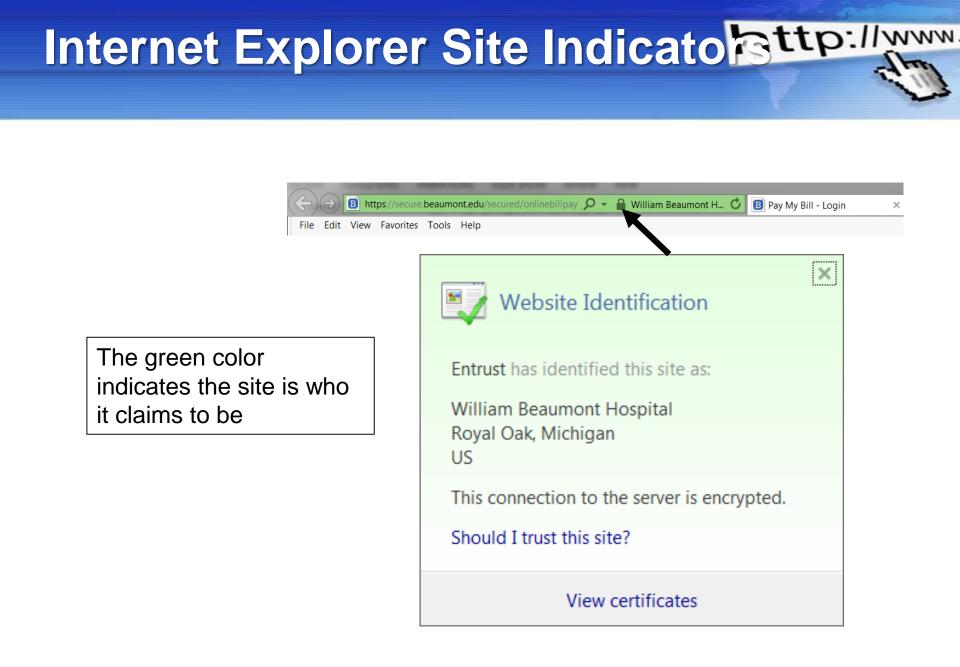

Look For Secure, Known Connections

Internet Explorer Site Indicato

Internet Explorer Site Indicato

If there's a problem with the security, you'll get a message like this.

	https://localhost/Test/test.txt 🔎 🗸 🖒 🖓 🥸	3					
Th	There is a problem with this website's security certificate.						
Th	The security certificate presented by this website was not issued by a trusted certificate authority.						
	Security certificate problems may indicate an attempt to fool you or intercept any data you send to t server.						
We recommend that you close this webpage and do not continue to this website.							
Ø	Ø Click here to close this webpage.						
8	😵 Continue to this website (not recommended).

Turn on 2-Factor (2-step) verification on apps with personal information or credit card information

- Most use text messages
- Some use authentication apps

- Hotels, Libraries, etc. have public PCs
- Very easy for owner or others to track your activity (assume keylogger)
- Don't access sites with sensitive data
- Use private browsing, delete history
- Don't plug any devices into them

Public WiFi

Validate the network name (beforehand)

- Easy for owner and sometimes others to see your activity
- Use a VPN (virtual private network)
- Use your own mobile hot spot
- Don't let anyone else connect to you
- Without VPN, don't access or use sites that require sensitive information
- Free VPN PCs: Hotspot Shield Chrome extension

Mobile Devices

- Fingerprint authentication
- Only use trusted apps (research them)
- At home, connect to your secure WiFi
- Outside the home, turn WiFi and Bluetooth off (they can track you - saves battery too!)
- Use a VPN: Opera Free VPN (for apple devices - no registration required)
- Delete apps you no longer use

Social Media

- What is social media?
 - Facebook
 - Twitter
 - LinkedIn
 - YouTube

- InstaGram

- SnapChat
- Pinterest
- Google+
- Etc.

Social Media

- Privacy settings Use Them!
- You control who sees your profile
- DON'T CONNECT WITH PEOPLE YOU DON'T KNOW!
- You control who sees your posts
- You control who can post to your timeline
- Can block users, messages, pages, invites, apps
- 2-Step authentication is under Security on Facebook (maybe others)
- Don't let apps post on your behalf

You can protect children from malicious or inappropriate content, profanity (Net Nanny) or cyber-bullying:

http://www

Net Nanny - \$39.99
 OpenDNS Home (Free – very reputable)
 SpyAgent - \$69.95
 Norton Family - \$49.99
